

S. A. KING SAID TO BE BENT ON URGING STORR'S CANDIDACY

Declared He Is On the Way To Washington As Emissary of
W. R. Wallace

Salt Lake, Nov. 27.—With the departure of Samuel A. King, prominently associated with the Democracy of Utah, for the national capital on a mysterious mission, prominent Salt Lake Democrats are again turning their eyes toward the federal appointments to be made in Utah. Although Mr. King's trip and the object of his mission in Washington, D. C., were announced, friends assert that Mr. King is the special emissary of National Committeeman W. R. Wallace and that he is to speak in behalf of George A. Storrs.

Several days ago the friends of Nebeker declared that they had received positive assurance that the marshalship appointment would go to Nebeker during the week notwithstanding the fact that the national committee favored the appointment of Storrs. It is the belief of the Nebeker supporters that the trip of Mr. King is being made in an effort to ward off the appointment of Nebeker and to urge again the appointment of Storrs.

Mr. Wallace denies that Mr. King in any way represents him in the business which he may take up in Washington.

"Mr. King told me early last week that he was going to Chicago and might take a trip to Washington," said Mr. Wallace last night. "However, I was not aware that he had left. As for being a representative of mine, I have not been informed of it if he is."

FIVE PROBLEMS SOLVED

Opinions and theories, until they have been tried, have but little value. People want to know facts made so by experiments and demonstrations. Failures and mistakes are too expensive, especially for the farmer who is working with small capital. If he knows what he has made good in years of actual practice he has some facts on which to base his work, and he knows if he does likewise, under similar circumstances he can expect like results.

About twenty years ago I was working to get the most in the way of a good living and a good suburban home, on my little place in Delaware County, New York. To do this I saw I must learn how to better utilize natural resources and forces. There is an almost infinite storehouse of plantfood in the atmosphere and soil. I saw farmers using only a few inches of the surface and getting little or no nitrogen from the atmosphere. I was told that the alfalfa-plant could send its roots down to the lowest depths of the soil for water and mineral food, and could take the nitrogen from the atmosphere and store so much of it in its stem and leaf that one ton of this

LIDA FLEITMANN ON ALDEEN PRIDE

Among the best of the woman riders exhibiting at the international horse show in New York is Miss Lida Fleitmann of Long Island, who is here seen on her fine hunter, Aldeen Pride.

dried was nearly equal to one ton of wheat-bran in feeding value, but I was also told that I could not grow it successfully outside the limestone soils. On the ordinary alluvial non-limestone soil of Delaware county, New York, twenty years ago I began to grow alfalfa and have grown it successfully on every part of my place. I have proved that the ordinary drained soil with a fair depth, can be made to grow good crops of alfalfa without fail, when all the conditions are faithfully complied with. I have found the growing of alfalfa on a small place where intensive small farming and gardening is practised has enabled me to keep cows and poultry with a profit on small areas, where it would be impossible to do so without; that there is no soiling crop on the earth that approaches alfalfa in value, as it produces four crops a year that aggregate six to eight tons of dried matter; that the green alfalfa, used to supplement a very small pasture for cows, will maintain the flow of milk beyond what it is possible to do with other food, and with no cash outlay. More than this, alfalfa is changing the character of my soil by filling it with large roots to its lowest depths, which improves its mechanical condition. Crops grow well in alfalfa soil with little or no fertilizer. Our table is furnished with alfalfa transformed into milk, cream, butter, cheese, eggs, fruits, vegetables all the good things from the soil.

We Sow Alfalfa In Spring

One thing I have settled upon is that in the latitude of New York alfalfa should be sown in the spring, as soon as the ground can be got in good condition; also, that at least one ton of stone lime an acre needed on average soil, or twice the amount of air-slaked or ground lime; that inoculation with alfalfa bacteria is needed; that a nurse crop of one-half bushel per acre of barley is better than sowing without a nurse crop, first sowing the barley, which is harrowed in, then pure alfalfa (better acclimated seed), thirty pounds to the acre, and rolling or planking the ground.

It is no longer a question as to the value of corn and soy-bean ensilage, for it has saved dairy farmers a large part of their grain-bill. Because of the protein content in the soy-bean vines, pods, and beans, the ensilage is more nearly a balanced ration. No extra work is required in growing soy-beans with corn, as the beans are mixed with the corn, about one-third in proportion

IF YOUR CHILD IS CROSS, FEVERISH, CONSTIPATED

Look Mother! If tongue is coated, cleanse little bowels with "California Syrup of Figs."

Mothers can rest easy after giving "California Syrup of Figs," because in a few hours all the clogged-up waste, sour bile and fermenting food gently moves out of the bowels, and you have a well, playful child again.

Sick children needn't be coaxed to take this harmless "fruit laxative." Millions of mothers keep it handy because they know its action on the stomach, liver and bowels is prompt and sure.

Ask your druggist for a 50-cent bottle of "California Syrup of Figs," which contains directions for babies, children of all ages and for grown-ups.

CONCERT GIVEN AT SMITHFIELD

Prof. Fogelberg's Students Entertain
With Music. Primary Also
Gives Concert

Smithfield, Nov. 25.—The students from Prof. Fogelberg's Conservatory of Music gave a concert in our city last night to a fairly good sized and appreciative audience.

The Second ward Primary repeated their concert on Tuesday night.

We notice in Student Life that Dresden Cragun, Gladys Merrill and Clifford Smith all appear on the college roll of honor at the A. C.

Word comes from Salt Lake City that Mrs. Aldray Scowther Anderson is the proud mother of a baby boy.

A building boom seems to have struck our town the past month, several buildings have been commenced. The High school gave a party on Tuesday night. The guests are all loud in their praise of the affair as a social success.

Mr. and Mrs. Smith of Salt Lake City are visiting Mr. and Mrs. Ves Low.

Mr. and Mrs. George Sant went to Clifton today to attend the John Sant birthday reunion at that place on Thanksgiving Day.

The W. O. W. ball on Saturday night was a decided success.

ground. In a month or two there was such a heavy, thick growth of buckwheat straw that not a spear of quack grass could grow up through it, and the pest was smothered and destroyed root and branch. It was much easier to let the buckwheat overcome the quack than to fight it with the hoe and cultivator.

Is Pasturing a Delusion?

One more we New York farmers are learning, it is that the average pasture is a delusion. It partly feeds the cows for a month or two early in the summer, then dries up and to keep up the flow of milk the dairy farmer must feed nearly a full winter ration of forage crops and grains. There is a method of mending old pastures grown up to briars, ferns, etc. that has proved to be the right way with us in New York. A portion of the old pasture is top-dressed in June and July with manure made by stabling cows in well bedded and ventilated pens. With very little clipping the weeds are killed and the grass comes on and I will suggest it is a good plan to scatter grass-seed through the manure in the gutter before drawing it out. Less area in pasture, reforesting steep rough hillsides, and keeping the pasture we have as clean as meadows, and supplementing in late summer with a reserve of ensilage, alfalfa, clover, oats and peas, green corn, etc. means to keep up the full flow of milk the cow is capable of, without cash outlay.

Stop coughing! You rack the lungs and worry the body. BALLARD'S HOREHOUND SYRUP checks irritation, heals the lungs and restores comfortable breathing. Price 25c, 50c and \$1 per bottle. Sold by Ritter Bros. Drug Co.—Advertisement.

Don't Miss "MISS FADE-AWAY"

FOR a WEEK we will give to every purchaser of

COMMUNITY SILVER

this beautiful picture—a Coles Phillips "Fade-away" girl in colors.

You all know Community Silver—the Plate de Luxe—with its beautiful designs and wonderful wearing qualities.

A MATERNAL VICTORY

Robby, dear!
Huh?
Time to get up!
All right, says Bobby, as he settles himself for another nap.
Thirty minutes pass.
Robby!
Whacker want?
I want you to get right out of that!

We'll, I will.
Fifteen minutes later.
Robert!

What do you want now?

You know what I want. I want you to get up. This is the third time I have called, and you know I never speak but once. Right up now!

Twenty minutes pass.

Robert Edgar Blank!

What is it?

I simply do not mean to call you again, sir! Breakfast was over more than an hour ago!

The clock ticks off another quarter

PAIN IN BACK AND RHEUMATISM

Torment thousands of people daily. Don't be one of these sufferers when for so little cost you can get well rid of the cause. Foley Kidney Pills begin their good work from the very first dose. They exert so direct an action on the kidneys and bladder that the pain and torment of back-ache, rheumatism and kidney trouble is soon dispelled. Co-operative Drug Co.—Advertisement.

CRANBERRY JELLY

Let a quart of cranberries cook in a pint of water till the skins burst, add a pint of granulated sugar, and let simmer for twenty minutes longer. Wet the inside of individual molds in cold water, pour in the cranberries, and let stand over night. At dinner time turn the molds out on lettuce leaves.

of an hour.

Rob!

Well, well?

Some Really Good Propositions Suburban Home

Four acres in North Logan, on car line, beautiful location, first classed soil and water-right, four roomed house, new cow barn and out buildings, two acre family orchard, balance lucern and pasture. Close to school and store. Price \$1850

DRY FARM

392 acres at Avon, soil a deep black loam, subirrigates from hills, aside from wheat raised from two to three crops of lucern without water, 100 acres cultivated, family orchard and six acres irrigated from spring, cow barn for fifty tons of hay, 12 cows and 12 horses, splendid pasture, ideal place to live, suitable for dairy farm. Price \$23.50 per acre.

DAIRY FARM RANCH

Ideal dairy ranch in Blacksmith Fork canyon, 440 acres all well fenced, 100 acres suitable for lucern or grain, plenty of spring water, and balance pasture land, small house cow barn and corrals. Just the place to run cows and make butter. Ideal place for summer home. Price \$2700 good terms.
